**myTexts touch
released!**

MOApp Software Manufactory has crafted and just launched a new software program on the market: myTexts touch - Distraction free writing for the iPad.

myTexts touch is the iPad buddy of my successful myTexts application for Mac OS X.

myTexts in general focuses on writers of all kind, who want to and have to be down to the ground concentrated on their texts and who don't want to struggle with overloaded and unnecessary complex applications.

It's all about text – about every single word – and not about formatting or other kinds of bells and whistles. With myTexts touch you are free to write on your iPad wherever you want to.

myTexts touch supports File Sharing with any Mac and PC (but of course works best with its Mac OS X companion) - thus you can always work with your latest texts.

myTexts touch is available thru the iPad App Store at a reasonable price of \$ 2.99.
myTexts touch is compatible with iPhone OS 3.2 or higher.
