MOApp Software Manufactory has crafted and just launched a new software program on the market: myWritings - The word processor for the rest of us and all those missing WriteNow.

### **What is myWritings?**

myWritings is a clean, fast and mighty writing environment for the daily 99% of our writing tasks. In most cases there is no need to use Word and we do not need its cluttered interface and of course not its speed.

We all just want to do our work - we don't want to read hundreds of pages of a manual first to realize, that it still does not work. We don't want dozens of buttons and labels and sub-buttons and panels and sub-panels. We don't need a speaking paperclip or ugly icons.

We all love OS X for its simplicity.

So too our Mac.

And that's why you'll love myWritings even more...

No clutter.

No single wasteful feature.

But a sophisticated and powerful functionality.

### **What is new in myWritings?**

myWritings is the successor of the almost seven years and very successful application Schreiben. Years of experience in writing software and word processors went into its GUI and handling.

Sometimes the best solution is to start from scratch.

With one goal. To keep it as simple and uncluttered as possible. Again.

## Features

- \* gorgeous and intuitive interface
- \* WYSIWYG editor
- \* page layout
- \* sophisticated styles/stylesheet section
- \* rich text formatting
- \* word count | statistics | word frequency
- \* continuous display | image scaling

- \* fast text search
- \* support for tables | comments | emphases
- \* support for all most important file formats
- \* it's fast - really fast!

## What Other People Have Said About myWritings

Staff Pick @ Apple

Featured Download @ Apple

★★★★★ @ MacUpdate

I just had a look at myWritings and I think it looks good.  
(Douglas Clarke, Co-Author of WriteNow)

A great app, it just works, developer is to be commended for willing to take a fresh clean approach to Word Processing.  
(MacUpdate)

I used Schreiben and have just switched to myWritings which I am very happy with. More intuitive, better looking, faster, sleeker - does exactly what is required - easy to use and stable - a lightweight word processor for my lightweight word processing.  
(MacUpdate)

## Requirements

Mac OS 10.5.8 and above

Mac OS 10.6.4 and Intel recommended

Printer, optional

## Price

Mac: USD 14.95

## Availability

myWritings is available now

## About MOApp Software Manufactory

[doing.more.with.less](#)

MOApp Software Manufactory is a state-of-the-art, SME software architect headquartered in Mainz, Germany.

MOPApp was brought to life by Michael Göbel, who has an unrelenting passion for crafting small-scale things with a super sleek, minimalist design. He believes that a software program should be as easy-to-handle as possible and that it should always only focus on solving one job seamlessly. In the process, the task at hand must be resolved as efficiently as possible and ideally, users will not even need to pick up a manual to read the instructions ...

MOApp Software is primarily tailored to private households, freelancers, independent contractors and self-employed people. Today, it provides more than twenty software products for highly diverse segments. Not only do its programs receive top-notch ratings from MacUpdate and comparable sources, but they are also continuously highly recommended by apple.com as a Staff Pick and Featured Download.
